TradingView Guide Tutorial: Master TradingView Without a Subscription

TradingView is a powerful online charting and analysis platform that is used by millions of traders worldwide. It offers a wide range of features, including real-time data, technical indicators, and charting tools. However, TradingView's premium subscription can be expensive, especially for beginners or casual traders.

Tradingview Guide: Tutorial to save you a subscription

In this guide, we will show you how to use TradingView without a subscription. We will cover everything you need to know, from setting up your account to using advanced charting tools. By the end of this guide, you will be able to use TradingView to its full potential, without paying a dime.

Setting Up Your TradingView Account

To get started with TradingView, you will need to create an account. You can do this by visiting the TradingView website and clicking on the "Sign Up" button. You will need to provide your email address, create a password, and choose a username.

Once you have created your account, you will be able to access TradingView's free plan. The free plan includes access to real-time data, basic charting tools, and a limited number of technical indicators.

Using TradingView's Charting Tools

TradingView's charting tools are one of the most powerful features of the platform. You can use these tools to create custom charts, track prices, and identify trading opportunities.

To create a chart, simply click on the "Chart" button in the top left corner of the screen. You will then be able to select the asset you want to chart, the time frame, and the type of chart you want to create.

TradingView offers a wide range of charting tools, including:

- Line charts
- Bar charts
- Candlestick charts
- Volume charts
- Technical indicators
- Drawing tools

You can use these tools to create custom charts that meet your specific needs. For example, you can use technical indicators to identify trading opportunities, or you can use drawing tools to mark important price levels.

Using TradingView's Technical Indicators

TradingView offers a wide range of technical indicators that you can use to identify trading opportunities. Technical indicators are mathematical calculations that are used to analyze price data. They can help you to identify trends, reversals, and other important price patterns.

To add a technical indicator to your chart, simply click on the "Indicators" button in the top left corner of the screen. You will then be able to select the indicator you want to add.

TradingView offers a wide range of technical indicators, including:

- Moving averages
- Bollinger Bands
- Relative Strength Index (RSI)
- Stochastic oscillator
- MACD

You can use these indicators to identify trading opportunities, or you can use them to confirm your own trading decisions.

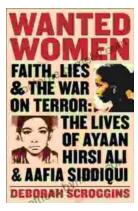

TradingView is a powerful online charting and analysis platform that can be used to improve your trading performance. By using the tips and tricks in this guide, you can use TradingView without a subscription. You will be able to create custom charts, track prices, and identify trading opportunities, all for free.

If you are serious about trading, then I highly recommend that you give TradingView a try. It is a valuable tool that can help you to make more informed trading decisions.
